

Churches need Security Cameras

Unfortunately, churches and places of worship are becoming more common targets among thieves and vandals—which means that it's never been a better time to invest in a security system for your church.

Not only can a reliable security system deter would-be criminals (66% of burglars admit to avoiding properties where alarm systems are visible—and homes and businesses without visible security are 300% more likely to be targeted), but you can add a sense of security for those who attend your services for worship.
